9- Admin login page.

A login form with a pink-to-purple gradient background. The title "Log In" is centered at the top in a large, bold, black serif font. Below it, the text "login here using your username and password" is centered in a smaller, black sans-serif font. There are two input fields: the first is light blue and contains the text "9Abeer9"; the second is white with a black border and contains seven black dots. Below the input fields is a purple button with the text "Login" in white.

Testing cases

1- Display Product.

In products page and product details information is retrieved from the database and displayed.

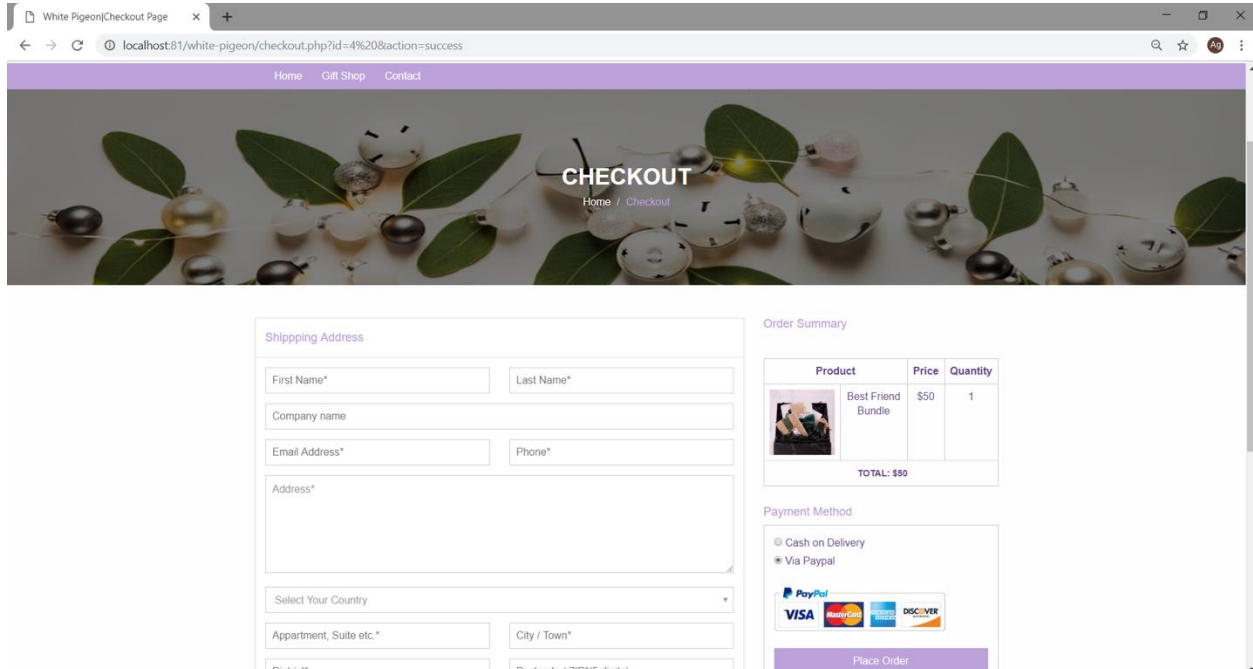

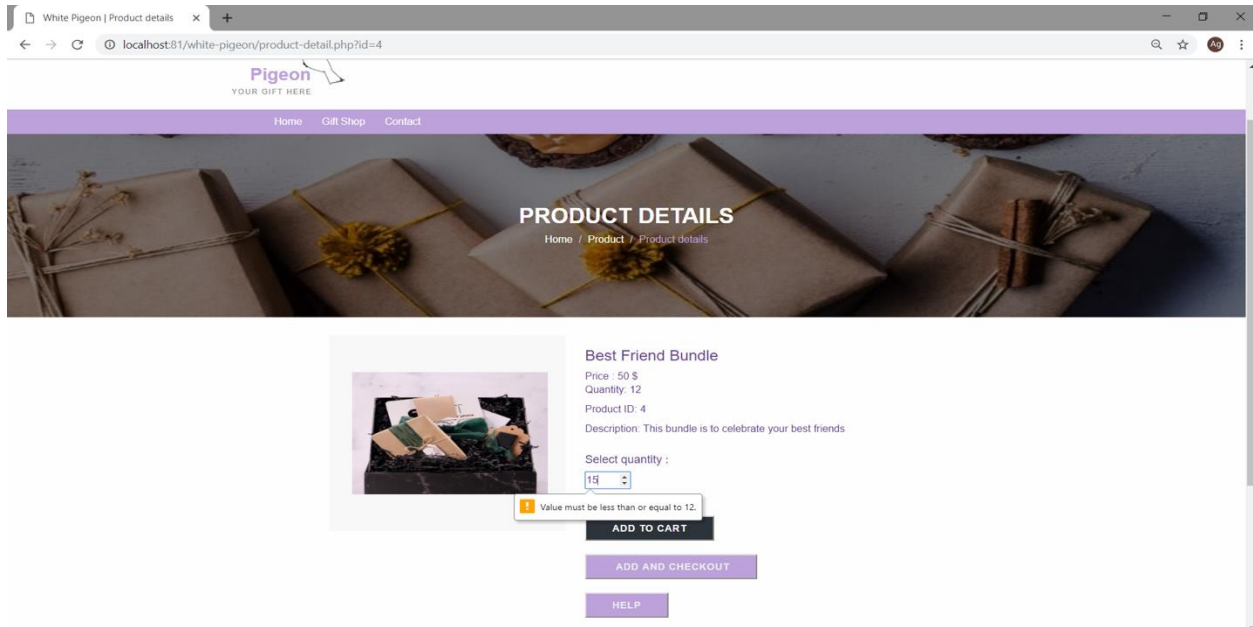

2- Display Product Details.

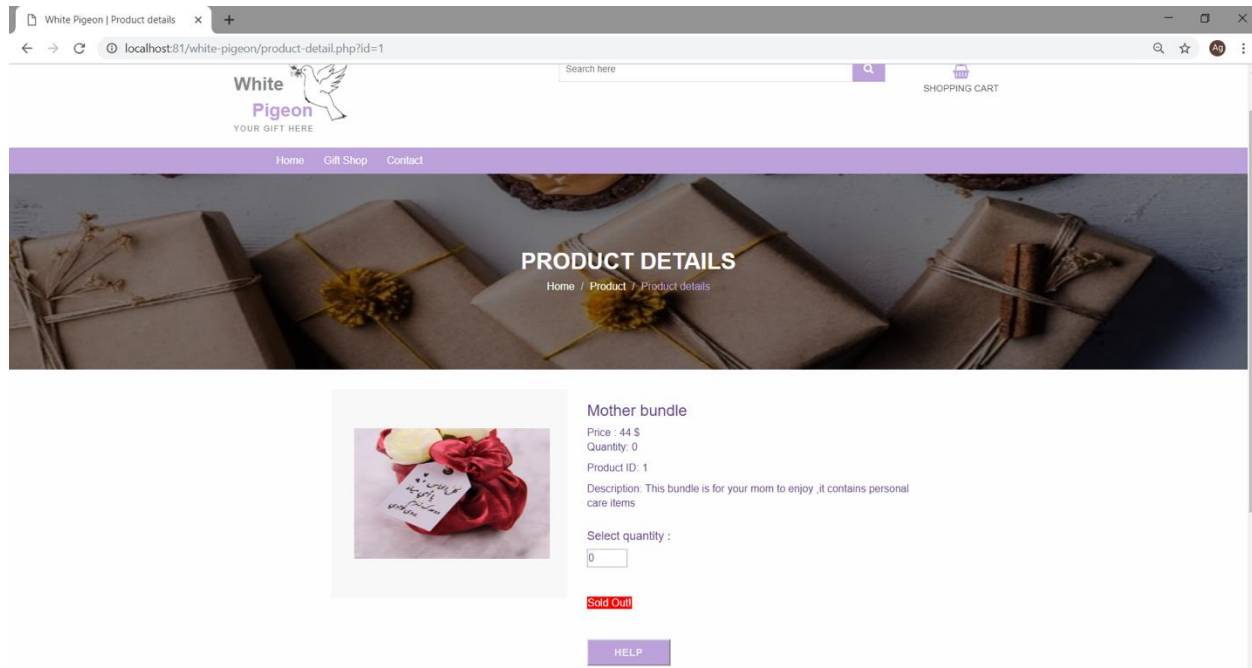

3- Add to Cart

the customer can choose the quantity of the product then add it to cart.

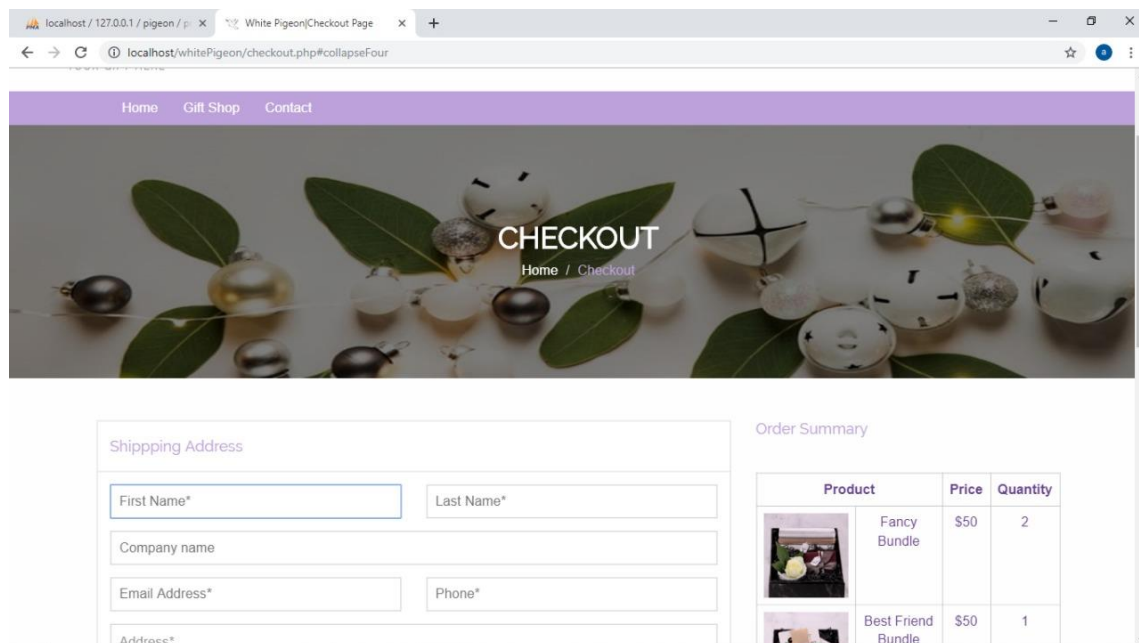

In addition, if the product is sold out the user can't add it to the cart as the add to cart button isn't available.

4- Checkout

Products in the cart will be displayed in the checkout page where the customer can modify the information.

5- Buy & past purchases

First, the checkout page filled with the necessary information.

Admin main page

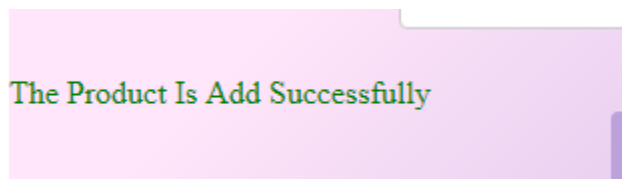

7- Add New Product

The screenshot shows a web form titled "Add Product" with a pink-to-purple gradient background. The form contains the following fields and controls:

- Uplode Image:** A file upload control with a "Choose File" button and the text "candle1.jpg".
- Product ID :** A text input field containing the value "123".
- Product Name :** A text input field containing the value "Candles".
- Price :** A text input field containing the value "363".
- Quantity (between 1 and 50):** A text input field containing the value "12".
- Description :** A text area containing the text "Great deal".
- Add:** A purple button located at the bottom right of the form.

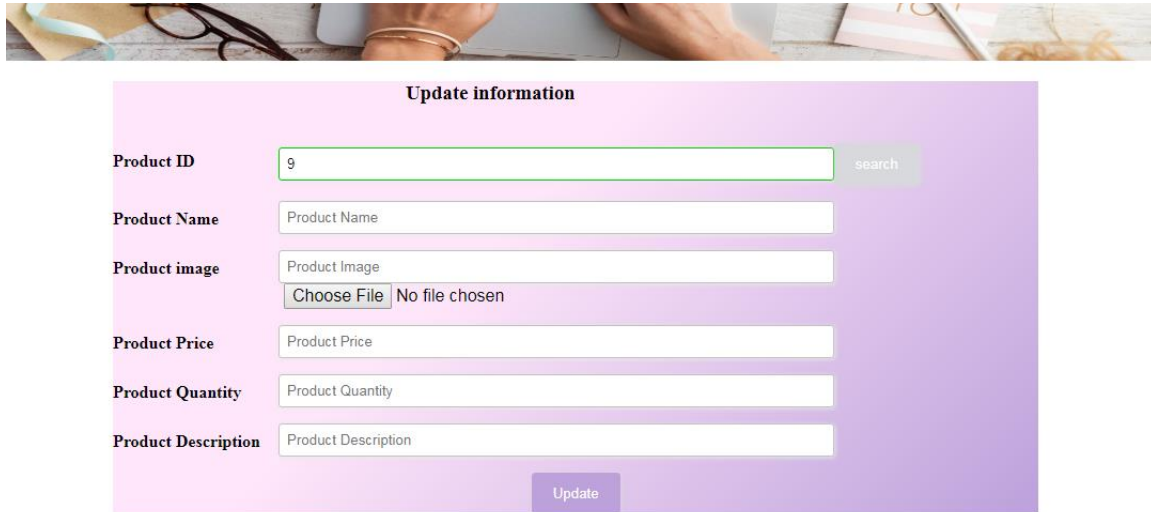

ADD product page when admin clicks Add and there is no error in data a conformation message will be displayed.

The screenshot shows a success message displayed in a pink-to-purple gradient box. The text reads:

The Product Is Add Successfully

8- Search for a product to modify or delete

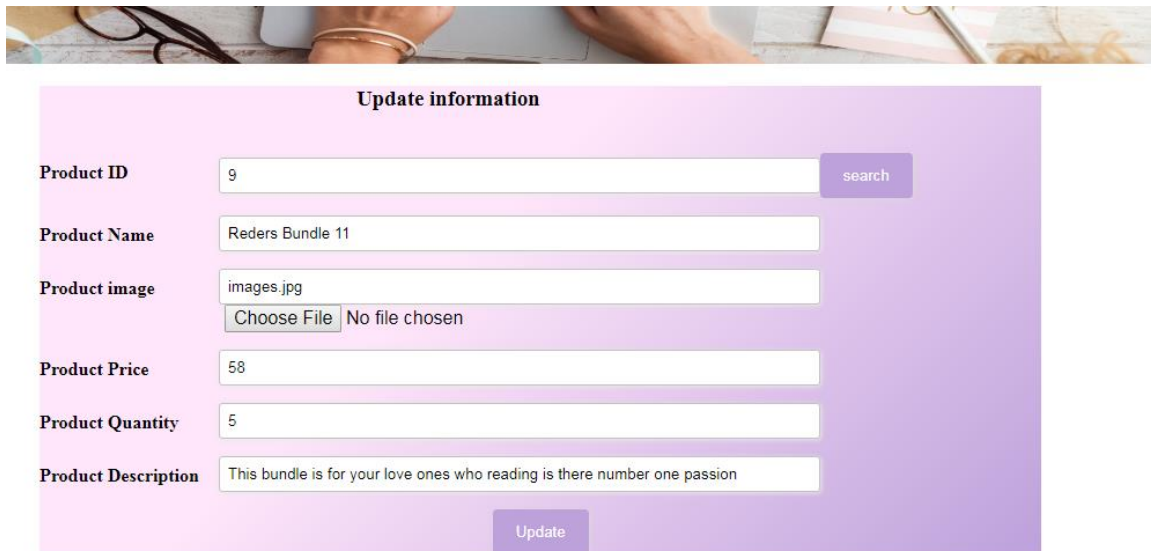

The screenshot shows a web form titled "Update information" with a light purple background. The form contains several input fields and buttons. The "Product ID" field contains the value "9", and a "search" button is located to its right. The other fields are empty: "Product Name", "Product image" (with a "Choose File" button and "No file chosen" text), "Product Price", "Product Quantity", and "Product Description". An "Update" button is at the bottom right of the form.

Update information	
Product ID	9 search
Product Name	Product Name
Product image	Product Image Choose File No file chosen
Product Price	Product Price
Product Quantity	Product Quantity
Product Description	Product Description
Update	

the admin insert product id first then clicks search button to fetch the data from database.

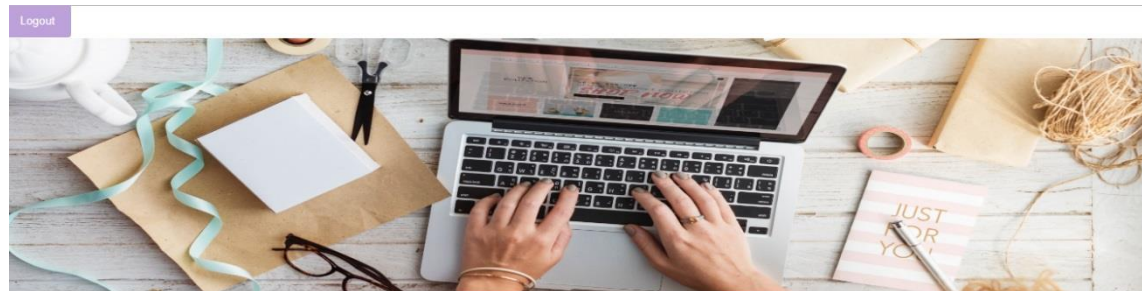

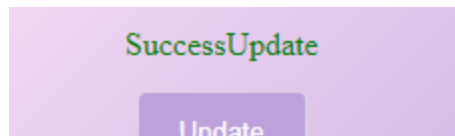

9- Update page.

The screenshot shows the same "Update information" form, but now it displays data fetched from the database. The "Product ID" field contains "9" and the "search" button is now disabled. The "Product Name" field contains "Reders Bundle 11", the "Product image" field contains "images.jpg" (with a "Choose File" button and "No file chosen" text), the "Product Price" field contains "58", the "Product Quantity" field contains "5", and the "Product Description" field contains "This bundle is for your love ones who reading is there number one passion". The "Update" button is still at the bottom right.

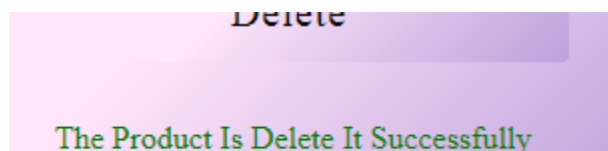

Update information	
Product ID	9 search
Product Name	Reders Bundle 11
Product image	images.jpg Choose File No file chosen
Product Price	58
Product Quantity	5
Product Description	This bundle is for your love ones who reading is there number one passion
Update	

if admin want to update any field, he/she can simply clicks on any field and change its content when Update is clicked and there are no errors a confirmation message will be displayed.

10- Delete Page

Admin can search for the product id then delete it if there is no error confirmation message will appear.

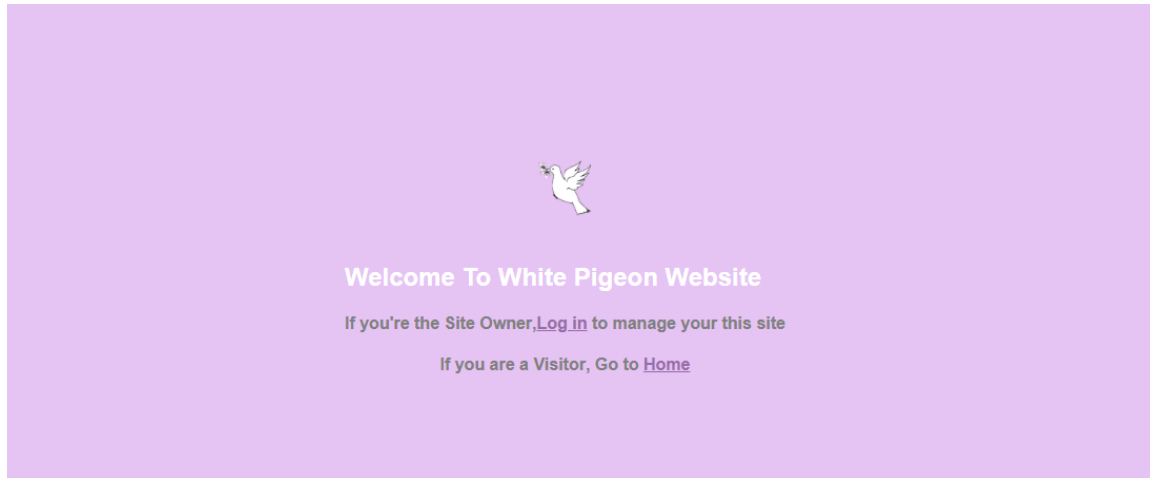

Add New Product

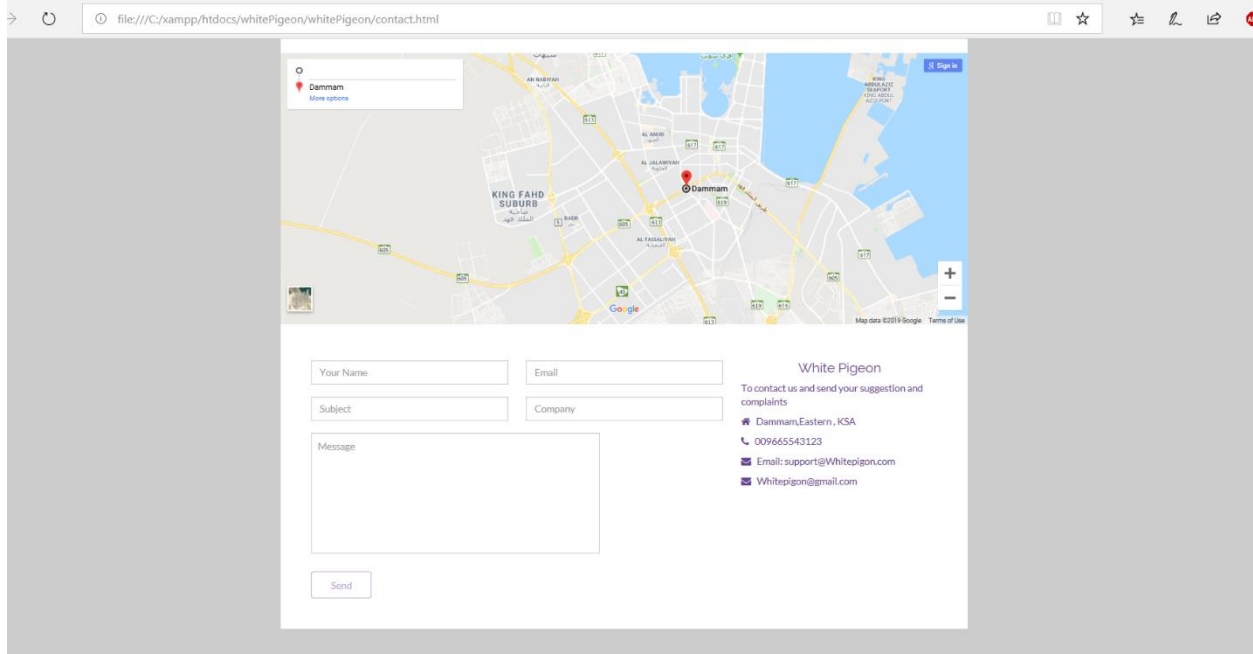

Update Product

Delete Product

A logout button is provided in every page the admin access it .and it will direct the admin to the home page.

11- Display address and location map

SUBSCRIBE OUR NEWSLETTER

12- Forms validation

An error would show if the user enters the wrong input

13- Help window

A pop-up help window will show when the customer presses on the help button for when he/she needs help.
